

Subject: Health & Wellness Notification

A new respiratory virus, called 2019-novel coronavirus (2019-nCoV), has been identified as the cause of an outbreak of respiratory illness that began in December 2019 in the city of Wuhan, Hubei Province, China. Additional cases are now being identified in other countries. You can find updated information on the [Centers for Disease Control and Prevention's](#) website.

The health and safety of our guests and crew is our number one priority. While none of our ships are currently sailing in any areas with confirmed cases, Windstar Cruises has implemented an enhanced health screening questionnaire for guests and crew to screen for possible coronavirus. Additionally, all crew travel through mainland China, Hong Kong and Macau has been suspended.

No one will be allowed to board a Windstar ship who:

- Has been in or travelled from or through China, Hong Kong or Macau in the 30 days prior to embarkation.
- Has within 30 days before embarkation had close contact with, or helped care for, anyone suspected or diagnosed as having Coronavirus, or who is currently subject to health monitoring for possible exposure to Coronavirus.

Prior to boarding a ship, all passengers and crew will be administered a no-touch thermal scan to screen for fever. Anyone with a fever ($\geq 38\text{ C}^\circ/100.4\text{ F}^\circ$) will not be allowed to board the ship.

In addition, Windstar Cruises will cancel the Star Breeze's 2020 Asia program. We regret the inconvenience to booked guests on these sailings which were scheduled to depart August 25 through November 29, 2020. Our team is working on communicating this change and alternatives to our guests and travel advisor partners. New sailings for the Star Breeze during this same time period will be announced soon.

As a member of Cruise Lines International Association, Windstar maintains close contact with health professionals and regulators around the world and will modify policies as developments emerge. Additionally, Windstar Cruises has implemented its highest levels of sanitation on all ships.

There is currently no vaccine to prevent Coronavirus. The best way to prevent infection is to avoid being exposed to this virus. However, as a reminder, the Centers for Disease Control (CDC) always recommends everyday preventive actions to help prevent the spread of respiratory viruses:

- Wash your hands often with soap and water for at least 20 seconds, especially after using the restroom; before eating; and after blowing your nose, coughing, or sneezing.
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty.
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- Avoid close contact with people who are sick, including sharing cups or eating utensils.
- Stay home when you are sick.
- Cover your cough or sneeze: cough or sneeze into your elbow, or cover with a tissue, then throw the tissue in the trash.
- Clean and disinfect frequently touched objects and surfaces using a regular household cleaning spray or wipe.

If you experience any symptoms of any illness while on board, please stay in your cabin and contact the Medical Center by dialing (ext. xxxx). Consultation charges will be waived. If you develop symptoms after leaving the ship, see a doctor right away.

In an effort to share information with you about traveler health, please refer to the attached brief FAQ. We look forward to serving you on board.

FAQs: Novel Coronavirus 2019-nCoV

Is Windstar currently sailing in any areas with confirmed cases of coronavirus?

No. We are currently not sailing to any areas with reported cases.

Is Windstar making any changes to deployment as a result of coronavirus?

Windstar Cruises will cancel the Star Breeze's 2020 Asia program. We regret the inconvenience to booked guests on these sailings which were scheduled to depart August 25 through November 29, 2020. Our team is working on communicating this change and alternatives to our guests and travel advisor partners. New sailings for the Star Breeze during this same time period will be announced soon. We are not making any changes to our spring 2021 Asia deployment at this time.

What are Coronaviruses?

Coronaviruses (CoV) are a large family of viruses that usually cause respiratory illness. A new (novel) CoV was identified in Wuhan, China, in December 2019 and is called 2019-nCoV.

What is the current situation?

The new coronavirus is causing an outbreak of illness in the city of Wuhan, China. Additional cases have been confirmed in other countries including the United States. The situation remains fluid. Stay up to date by visiting the [Centers for Disease Control's](#) website.

What are the symptoms of 2019-nCoV?

Signs of infection may include respiratory symptoms, such as fever or feverishness, cough, shortness of breath, and breathing difficulties.

How is the virus transmitted?

Health authorities say it can be passed from one person to another through close contact, such as caring for or living with an ill person.

How can I minimize the risk of catching or spreading a respiratory illness?

The Center for Disease Control (CDC) always recommends everyday preventive actions to help prevent the spread of respiratory viruses:

- Wash your hands often with soap and water for at least 20 seconds, especially after using the restroom; before eating; and after blowing your nose, coughing, or sneezing.
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty.
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- Avoid close contact with people who are sick, including sharing cups or eating utensils.
- Stay home when you are sick.
- Cover your cough or sneeze: cough or sneeze into your elbow, or cover with a tissue, then throw the tissue in the trash.
- Clean and disinfect frequently touched objects and surfaces using a regular household cleaning spray or wipe.

What are the treatments?

There is no specific antiviral treatment recommended for the new coronavirus infection. Individuals with respiratory infections should seek medical care to help relieve symptoms.

Is the new Coronavirus the same as SARS or MERS viruses?

It is a similar type but not the same virus that caused SARS or MERS.

What is the preventive action Windstar has taken?

Along with other Cruise Lines International Association member cruise lines, Windstar Cruises now requires each guest and crew member to fill out a health questionnaire specific to coronavirus prior to boarding the ship and undergo a no touch thermal scan to screen for fever. Anyone with a fever ($\geq 38\text{ C}^{\circ}/100.4\text{ F}^{\circ}$) will not be allowed to board the ship.

The sanitation levels on all ships are being elevated.

Guests or crew who have been in or travelled from or through China, Hong Kong or Macau in the 30 days prior to embarkation are not being allowed to board the vessel. Guests who within 30 days before embarkation have had close contact with, or helped care for, anyone suspected or diagnosed as having Coronavirus, or who are currently subject to health monitoring for possible exposure to Coronavirus, are not being allowed to board the vessel. Additionally, all crew travel through mainland China, Hong Kong and Macau has been suspended.

If you experience any symptoms of illness while on board, please stay in your cabin and contact the Medical Center. Medical visitation fees are currently waived on board Windstar Cruises' ships for guests presenting with symptoms of the coronavirus. If you develop symptoms after leaving the ship, see a doctor right away.
